

## Advanced web-based examination, evaluation, and test administration tools for the e-learning marketplace!

"Our organization had been looking a long time for a web-based testing product that could meet our security and reliability requirements. I never want to tell someone they have to start over because their browser crashed after completing 55 of 60 questions. Since TestManager ensures against loss of work if a PC or Internet glitch interrupts someone during a test, our certification program has been greatly improved, and so has its profitability!"

Dennis McGarry, VP of Information Services  
Document Management Industry Association (dmia.org)

*With TestManager, the sequence of both questions and answers for each test-taker can be automatically randomized to make cheating difficult.*

- **Smooth recovery from 100% of PC problems.**
- **Can scale to handle state-wide testing programs**
- **Easy to use** over the Internet or school network without involving web technicians. Perfect for teachers who are averse to using technology.
- **Administration controls** by teacher, assistant, department, or school
- **Language Support** - Tests and Surveys can be given in any language, products operate in English, French, German, or Spanish

"Of the web-based testing software I have reviewed, TestManager from ACTS provides the most flexible and comprehensive approach for objective examinations."

Dr. David E. Douglas, Professor  
Computer Information Systems & Quantitative Analysis  
Sam M. Walton College of Business Admin., Univ. of Arkansas

### Important Features:

- Smooth recovery from 100% of failures caused by PC hardware, PC software, or the network
- Easy for non-programmers to create questions and tests and to administer testing session
- No web technicians or programmers required
- Automatic grading
- Easily interfaced to your database or learning management system
- Standard and adaptive test formats
- Surveys and evaluations delivered with tests
- Advanced security features and access controls
- Sophisticated reporting for test and item analysis
- Test navigation controls configured by test
- Question sequence randomization
- Answer sequence randomization
- Tests built from question pool
- Instant e-mail notifications
- Instant off-site backup of test results
- 10 question formats
- Multiple scoring options
- 5 options for handling remediation
- Multimedia support
- Enhanced proctoring and surveillance
- Runs on Linux, UNIX, Win NT and Win 2000

Compared to paper-based testing, **TestManager** eliminates as much as 95% of the cost to administer and grade tests.
